

Project Scope

250 I/O

pharmaceutical installations

1 process unit with the filter press as Package Unit
6 modules infrastructure to work the filter press

process control technique

SPS control system S7 with Siemens Visualisation MP 270
operation on site, right at SPS box,
box model is Ex n P, Profibus DP with RPI
sequence control system, can be parametrized through Excel
by operator

Finished Projects

Transaction as GU
for automation
and electrics

project management of
automation and electrics
scheduling and control
entire planning of automation
and electrics
delivery of switch cabinets
delivery of wiring
qualification PE and automation
and electrics
